

REMARKS

Claims 64 has been cancelled without prejudice to the filing of continuing applications. Claim 1 has been amended without prejudice to the filing of continuing applications to the cancelled subject matter.

Claims 1, 2, 4, 7-39, 41-55, and 64 stand rejected under 35 U.S.C. § 112, first paragraph. The Office has concluded that heterocycloalkyl groups are not enabled within the definitions of $-NR_3R_4$ and $-NR_6R_7$. For the reasons noted in their prior response, Applicants respectfully disagree. A person of ordinary skill in the art could readily prepare compounds containing such groups based on the teachings of the application and the general knowledge available to those in the art. Nevertheless, "heterocycloalkyl" has been removed from the scope of the definitions of $-NR_3R_4$ and $-NR_6R_7$ to expedite prosecution. Further, Applicant has added imidazyl(C_2-C_4)alkoxy to the definition of the $R^{11}-R^{13}$ substituents on the phenyl group within "G". The group imidazyl(C_2-C_4)alkoxy is a substituent on the phenyl ring in the compound of Example 11 (see Table II); the compound of that example is claimed in claim 11. The imidazylalkoxy group is clearly enabled by the instant specification. As amended, the claims are fully enabled;

reconsideration and withdrawal of the § 112 rejection is respectfully requested.

Allowance of the claims and passage of the case to issue are respectfully solicited. Should the Examiner believe a discussion of this matter would be helpful, the Examiner is invited to telephone the undersigned at (312) 913-0001.

Respectfully submitted,

Date: September 4, 2003
